

Rapid Readout Notice

The Economic Impacts of Repealing the Endangerment Finding

Friday, March 20 • 12:00 – 12:30 PM EDT

Online Only • Please RSVP @ eesi.org/032026epa#rsvp

Live webcast will be streamed at eesi.org/livecast

The **Environmental and Energy Study Institute (EESI)** invites you to a Rapid Readout about the consequences of the recent repeal of the Environmental Protection Agency’s (EPA’s) 2009 Endangerment Finding for the economy, climate, and public health. The Endangerment Finding established that greenhouse gases are warming the planet and endangering public health and welfare. For 17 years, this determination has served as the basis for EPA regulations limiting industrial and vehicle emissions.

Now, the repeal is expected to have wide-ranging impacts on energy markets and the U.S. economy more broadly. According to an EPA analysis, this repeal could cost Americans up to **\$1.5 trillion**, negating any potential savings from deregulation. This readout will outline projected ripple effects on the U.S. economy and identify possible paths forward.

Featured Speaker:

- ▶ **Zahra Hirji**, Reporter, Bloomberg News

This event is free and open to the public.
