

Briefing Notice

Environmental and Economic Impacts of Super El Niño

Friday, September 25, 2026 • 12:00 - 1:00 PM EDT

Online Only

Please RSVP @ eesi.org/092526weather#rsvp

Live webcast will be streamed at eesi.org/livecast

The Environmental and Energy Study Institute (EESI) invites you to an online briefing about the environmental and economic impacts of Super El Niño. **El Niño** is a natural phenomenon that occurs every few years when the ocean waters of the equatorial Pacific warm beyond normal temperatures. The 2026-2027 Super El Niño is projected to be the **largest in 150 years** and is expected to result in more frequent and intense extreme weather events across the United States and the world. This briefing will examine the meteorological causes and anticipated impacts of Super El Niño, including flooding, droughts, extreme heat, wildfires, and severe winter storms.

Speakers for this session include:

- ▶ **Matt Rogers**, President, Meteorologist and Co-Founder, Commodity Weather Group, LLC
- ▶ **Doug Hilderbrand**, Executive Director, American Weather Enterprise Association (AWEA)

This event is free and open to the public.

For more information, contact Daniel O'Brien at dobrien@eesi.org or (202) 662-1880.
