Low Income Home Energy Assistance Program

- Block grant, established in 1981
- Bipartisan Support
- Congress appropriates funds annually
  - Not an entitlement program
- Normal federal funding for LIHEAP is about $3.7 billion – enough to serve 6 million households.

The mission of LIHEAP is to assist low income households, particularly those with the lowest incomes that pay a high proportion of household income for home energy, to help meet their immediate home energy needs.
One out of three households helped by LIHEAP went without food for at least one day in the past year.

LIHEAP helps keep our most vulnerable neighbors safe.

The $900 million in supplemental funds provided for LIHEAP in the CARES Act are now fully obligated, and have been able to reach only a fraction of those households that need support.

Reflecting the rapidly changing conditions, NEADA estimates that 15 to 20 percent of residential customers are at least 60 days behind on their utility bills.

More than 1/4 of those who lost jobs during the COVID-19 crisis reported skipping or needing to skip a utility bill payment.

Electric and natural gas arrearages were expected to reach $32 billion by the end of 2020, based on an analysis by The National Energy Assistance Directors Association (NEADA).
128 times.
Data makes the go ‘round

- More than **45 million Americans filed for unemployment during the crisis**, many of whom remain unemployed or under-employed and are now eligible for LIHEAP
- In some states, **1 in 3 households is behind on utility bills**
- 22% of utility customers reported that they had **reduced or put off expenses for basic needs like medicine and food** in order to pay their utility bills
- More than **60% of U.S. K-12 schools reopened virtually** for the 2020-2021 school year, underscoring the importance of energy affordability to education access for millions of children
- **42% of the U.S. labor force is working from home fulltime**, with many others suffering job loss or reduction of hours. Access to power is critical to maintaining work for the remaining household member(s)
Shutoff Moratoria

According to the National Energy Assistance Directors Association (NEADA)

- 43 states and DC currently have mandatory shutoff moratoria in place
  https://neada.org/wintercovid19moratoriums/

- Patchwork of voluntary moratoria

- Challenge: Customers are still responsible for the bill
$10 billion in supplemental LIHEAP funds

- **50% for arrearages:** pay off energy debt for 4 million households (source: NEADA)

- **50% for current bills:** help 7.7 million households stay current on their bills between now and September 30th (source: NEADA)

2,109,662  # of households eligible for LIHEAP in Texas

149,352  # of low-income households that received LIHEAP in Texas in 2019

Only 7.08% of the total eligible population in Texas received LIHEAP in 2019

80.93% of LIHEAP recipients in Texas have at least one vulnerable member:

- elderly over 60: 42.74%
- disabled: 54.29%
- child under 6: 17.29%

Federal home heating/cooling assistance saves Texas lives.
NEUAC urges Congress to protect LIHEAP funding for FY21.

Why Protect LIHEAP Funding?

The Low-Income Home Energy Assistance Program (LIHEAP) provides critical home heating and cooling help to millions of vulnerable American families. LIHEAP funding peaked when Congress appropriated $5.1 billion for the program in FY09 and FY10. Since then, funding has fallen by more than one-third. Because of these cuts, one million fewer eligible households receive energy assistance, and average individual grants have been reduced.1

LIHEAP is not an entitlement.

Unlike entitlement programs, LIHEAP is funded by the annual congressional appropriations process. While states set eligibility rates, federal statute limits household income to a maximum of 150 percent of the federal poverty guideline, or 60 percent of the state median income. For example, 350 percent of the FY09 poverty guideline for a family of three is $31,995.2 Most LIHEAP recipients earn much less than the maximum thresholds; the latest data show that a typical LIHEAP recipient household had a median income of $8.5 percent of the federal poverty guideline.3

The need for LIHEAP remains high.

In 2018, the national poverty rate was 11.5 percent, and 38.1 million Americans lived in poverty.4

LIHEAP prioritizes vulnerable households.

More than 90 percent of LIHEAP recipient households have at least one vulnerable person - a senior aged 60 or older, a child aged 16 or under, or an individual with a disability.5

LIHEAP makes the difference.

The Federal Reserve found that nearly half of American families would struggle to pay for an emergency expense costing $400.6 LIHEAP frequently meets those exact short-term emergencies and can be the difference between making ends meet or not.

Protect LIHEAP.
